The UVM STEM Project will be conducting a fire pump test on Thursday April 6, 2017 at 1:00 pm. This test will last approximately 10 minutes and will flow approximately 20K gallons of water. Adjacent building occupants may experience discolored water due to the naturally occurring minerals and sediments that accumulate in the water mains and are disturbed via the flushing/flow process. If this should happen, please let the cold water run for several minutes and this will help clear your water.

Point of contact for this test is Todd Merchant, FD&C Senior Project Coordinator, todd.merchant@uvm.edu or 802-316-6742.

Regards,
Bruce
