The University of Vermont Medical Center Project will be flushing an existing section of water main for approximately 2-5 minutes on Tuesday April 24, 2018 11:00am – 11:30am. Adjacent building occupants may experience discolored water due to the naturally occurring minerals and sediments that accumulate in the water mains and are disturbed via the draining and filling process. If this should happen, please let the cold water run for several minutes and this will help clear your water.

Point of contact for this flush is Page Sisk, Whiting -Turner Field Superintendent @ 203-410-4452 cell
Or Todd Merchant UVM @ 802-316-6742 cell
