SLATE ROOFING MATERIAL POLICY

By the **Design Advisory Board**
May 16, 1995

Slate roofs shall be maintained, not replaced by substitute roofing materials, unless there exist numerous compelling reasons otherwise.

If an application is brought forward to the Design Advisory Board, the following items should be included.

1. Submit photographs of the building including all elevations with visible portions of the roof.
2. Describe the reason why you feel the slate roof should be removed.
3. If applicable, include a statement by an experienced architect, contractor or engineer as to the condition of the roof structure.
4. Describe the roofing materials on adjacent buildings.

Please note: This policy was passed by the Design Review Board which has subsequently been renamed the Design Advisory Board.
